

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

They offer a wider range of services, including preventive care, chronic disease management, mental health services, and social support programs. Health hubs may also have on-site pharmacies, laboratories, and imaging facilities.

Health hubs and medical clinics are both important parts of the healthcare system, but they have different strengths and weaknesses.

Health hubs are typically larger and more comprehensive than medical clinics

Does the clinic offer the range of services that you need? For example, if you have a chronic condition, do they offer specialized care for that condition

: Is the clinic located in a convenient location for you? Are the hours of operation convenient?

Are the clinic's fees affordable for you

health hub medical clinic

This includes annual checkups, immunizations, and screenings.

This includes care for conditions such as diabetes, hypertension, and asthma

This includes counseling, therapy, and medication management

They offer a wide range of services, including preventive care, chronic disease management, mental health services, and social support programs.

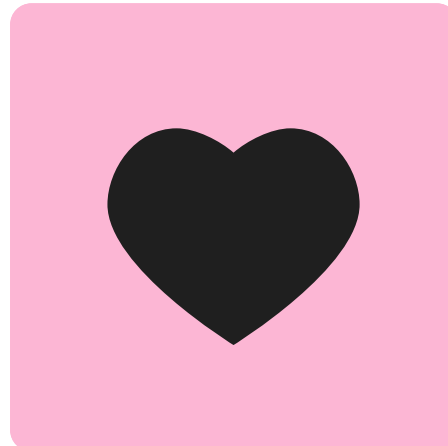

They may have on-site pharmacies, laboratories, and imaging facilities, which can be convenient for patients.

They can provide more comprehensive care for people with complex health needs.

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
